

The Pink Lat Pack™

A NEW STANDARD FOR SAFE, EFFECTIVE, AND EFFICIENT LATERAL POSITIONING

Safety Maximized

Increase patient safety with DermaProx™ and PinkProtect™: breathable, moisture-wicking materials that gently immerse and envelope areas prone to pressure injury.

Standard of Care Emphasized

No customization required. Pink Lat Packs™, regardless of weight or BMI, provide a safe, consistent standard of care for every patient, in every procedure, every time.

Efficiency Optimized

In clinical trials, an average of 15–20 minutes were saved during setup. When necessary, The Pink Lat Pack™ makes repositioning faster, safer, and easier.

“HAPI occurrence affects 2.5 million patients per year, adding more than \$43,180 per patient on average in-hospital costs.”

(October 2014. Agency for Healthcare Research & Quality)

“For years prior to the introduction of Pink Lat Packs, we at Yale New Haven Hospital relied on reusable devices for patient positioning in the lateral-decubitus position. Interrupting procedures to reposition patients could negatively impact both patient safety and surgical efficiency. Pink Lat Packs are now an important component of our efforts to safely secure our patients, protect their skin and, ultimately, improve surgical outcomes.”
